РУБРИК

ЗВЕРОТРОН

RU-ZVT-2

РУБРИК представляет...

Код красный! Экипаж корабля «Косинус-1» совершил аварийную посадку на неизвестную планету! Теперь, чтобы выжить в новом диком мире, зелёному новобранцу Киру придётся учиться выживанию.

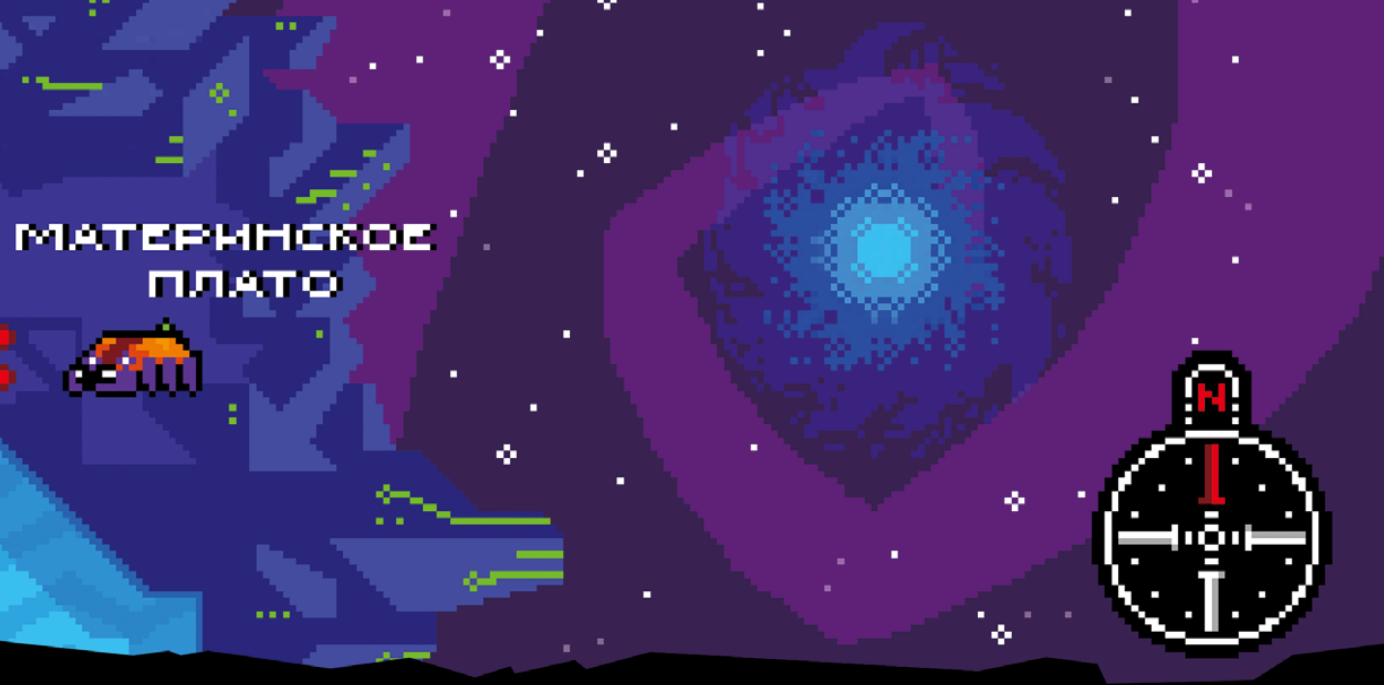

Добро пожаловать на планету...

Планета Зверотрон полна тайн и загадок. На поверхности она выглядит райским местечком. Но стоит приглядеться, и лианы окажутся оголёнными проводами, море — лужей бензина,

а почва под ногами — гигантскими микросхемами. А ты бы смог пройти через радиацию, машинное масло и медные трубы?

3 Когда увидишь этот значок, открой все пакеты с указанной цифрой.
А в маленьком квадрате — подсказка, сколько их лежит в коробке.

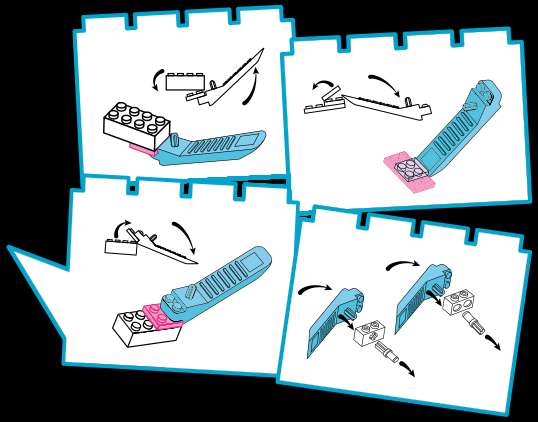

Если увидишь этот значок, тебе нужно будет повернуть собранную часть.

Эта штуковина называется сепаратор!

Иногда детальки соединяются та-а-а-ак крепко, что без сепаратора никак не обойтись!
Он бережёт наши зубы, время и нервы :)
А ещё он помогает сохранять детали в отличном состоянии.

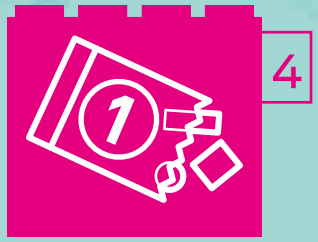

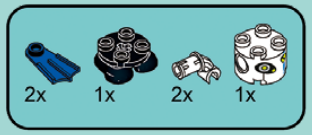

Этот QR-код открывает электронный вариант инструкции, если тебе так удобнее.

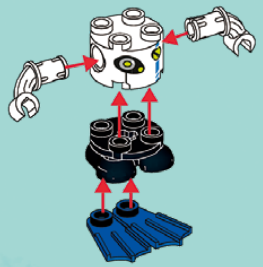

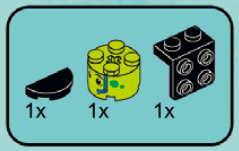

Служба заботы о клиентах
РУБРИКА: **ask@rubrick.ru**
Всегда подскажем и поможем разобраться в детальках!

Чтобы покинуть Зверотрон, Киру нужно найти Ракетиум — местный источник энергии. Но берегись, кажется, что планета обитаема и есть те, кто не прочь этим минералом полакомиться...
